

Commuter Bus

General Description:

Commuter Bus or Express Bus Service reduces travel time by going long distances between destinations with little or no stops. Express service may stop at several close pick up points and then travel non-stop to a final destination point. Express Route Service increase passenger mobility because multiple passengers use the service at once. The reduction in vehicle trips reduces the demand placed on the facility.

Effects of Solution:

- ☑ Increase Passenger Mobility
- ☑ Increase Roadway Capacity
- ☑ Manage System Efficiency
- ☑ Reduce Local Demand (reduces vehicular demand)

Costs/Financial Information:

Costs will vary depending upon the vehicles.

- Motor coach - \$350,000 to \$500,000
