Introduction

On December 9, 2009, BMC issued a request for Proposals (RFP) for a Regional Economic/Demographic Outlook for 2060. Possible respondents were permitted to seek clarification with questions via e-mail.

This document provides answers to those questions.

1. What is the level of effort required? *The work must be performed in the timetable provided in the RFP.*
2. Will the December 16, 2009 meeting of the Cooperative Forecast Group be open to the public? *Yes, meetings of the CFG are open to the public. However the Chair can, in limited instances, call for a closed-door session to discuss a particular agenda item.*
3. Will attending the December 16, 2009 meeting of the CFG preclude me from responding to the RFP? *No.*
4. How many copies should we estimate for the printing costs? *For the deliverable, we require just one hardcopy. We also require a complete PDF package (i.e. one click to print it all) as well as all source text, tables and photos/graphics in native (editable) file formats.*

For native file formats we require text to be in Microsoft (MS) Word, tables/charts in MS Excel and photos/graphics in JPEG/EPS format, unless both parties determine an alternative file format(s) to be suitable.
