

Andrea Denny - Local Climate & Energy Program Lead - U.S. EPA

Ms. Denny works in the State and Local Branch of the EPA's Office of Air and Radiation. The branch focuses on supporting state and local governments who are developing policies and programs to address climate change. These measures reduce emissions of air pollution and greenhouse gases, save customers money, promote economic development, and improve quality of life. Ms. Denny is the team lead for the [Local Climate and Energy Program](#), as well as the lead on state and local greenhouse gas inventory methods. Ms. Denny received an M.S. in geography and an honors B.S. in chemistry from Penn State.
