

Luke Wisniewski

Luke has been working in the Climate Change Division of the Maryland Department of the Environment (MDE) since 2008. Prior to this position, he worked for MDE on brownfield redevelopment at sites including the location of the General Motors Assembly Plant in Baltimore. Luke originally started his career at MDE in the Mobile Source Control program, with involvement in the original effort to evaluate the California Low Emission Vehicle standards. Additionally, Luke has experience working on vehicle emissions and fuel economy at SAAB/General Motors.

Luke has a Bachelor of Science degree in Mechanical Engineering, with concentrations in automotive and electrical engineering from the former General Motors Institute, now Kettering University. Luke has two young children and a wife in graduate school.
