BWI Station and Track Improvements

TIP Id #	70-1001-54	**Year of Operation**	2016
Agency	MTA – Commuter Rail	**Project Type**	Preservation & Improvements
Project Category	Commuter Rail	**Functional Class**	NA
Conformity Status		**Physical Data**	Add 4th Track
CIP/CTP Page#	NA		

Description	Justification
MDOT received $9.4 million to perform Preliminary Engineering for a 4th track, new platform and station building at BWI station. The new station building will utilize Green design to accommodate growing BWI ridership and other development needs. The Maryland Aviation Administration and MDOT's Office of Real Estate are engaged in additional studies to support the station's development.	The track improvement includes 9 miles of new 4th track to build out the corridor and reduce congestion while improving safety. The new platform will accommodate the new track and allow for an island platform so that all tracks could be used for passenger services.

FRA High Speed Intercity Passenger Rail (HSIPR)
