Agency	MTA - Commuter Rail	Project Type	Preservation and improvements
Project Category	Commuter Rail	Functional Class	NA
Conformity Status	Exempt	Physical Data	NA

Description	Justification
In this region a section of track between Carroll Interlocking and St. Denis would be rehabilitated and slower speed tracks would be relocated to provide a third main line high speed track. The additional main line track will reduce conflicts between MARC and CSX trains operating in Baltimore terminal allow MARC to maintain schedules. In the Hyattsville and Anacostia areas similar improvements will be made resulting in less congestion on the Camden Line during rush hour.	These two projects would provide necessary track improvements to assist in meeting current demands on track access and capacity as identified in the MARC Master Plan and MARC Comprehensive Study. These improvements are also covered in the operating agreement with CSX Transportation, Inc.

Agency	MTA - Transit	Project Type	Fleet improvement
Project Category	Emission Reduction Strategy	Functional Class	NA

Planned replacement for FY 08 includes 60-100 new hybrids. An additional 50-100 hybrid diesel buses are planned for replacement in each year of the next four years.	In order to reduce operating and maintenance costs, MTA is committed to procuring new buses to support fleet capacity requirements and to replace aging equipment. The systematic replacement reduces high out of commission rates and the excessive major repair problems that arise from retaining buses beyond their economical life. Replacement buses meet higher federal emissions standards.
