

IV. EXPLANATION OF TERMS AND SYMBOLS

The Baltimore region TIP covers a five year period. It includes projects for which federal funds are expected to be requested in Fiscal Years 2008, 2009, 2010, 2011 and 2012.

The projects are listed first by implementing agency, including: City of Annapolis, Baltimore City, the five counties in alphabetical order, MTA - Commuter Rail, MTA - Transit, the State Highway Administration (SHA), the Baltimore Metropolitan Council, and the MDOT Secretary's Office. Projects to be implemented by SHA are broken down further by jurisdiction in alphabetical order. Projects advanced by MdTA are funded through user revenues and can be found in the Regionally Significant and Non-Federally Funded Transportation Improvements section of this document.

After the sponsoring agency, projects are listed by category in the following order: commuter rail, enhancement program, environmental/safety, emission reduction strategy, highway capacity, preservation and transit. The ERS category consists of the following types of projects: ridesharing, park-and-ride lots or garages,

bicycle and pedestrian facilities, traffic engineering, fleet improvement and system expansion. The preservation category consists of the following types of projects: road resurfacing/rehabilitation, road reconstruction and bridge repairs/deck replacement. All new, relocated or widened roads and bridges or interchange reconstructions that increase capacity are considered highway capacity, not preservation. Each category of projects is further subdivided by funding source.

The project numbers (TIP Reference Number) printed below each project name show the project's location and type according to the following codes: **AB-CCCC-DD**, where:

Wherever possible, local Capital Improvement Program (**CIP**) number and state Consolidated Transportation Program (CTP) page numbers are provided to assist in finding projects in their respective capital improvement or development programs. For road and bridge projects, the **Functional Class** of the existing

facility as specified by the most current FHWA functional classification is given. Functional classes are:

- Interstate
- Freeway
- Principal arterial
- Minor arterial
- Collectors, major or minor
- Local

Funding Source indicates the source of federal aid using the following symbols:

- IM - Interstate Maintenance
- IS - Interstate Substitute
- ITS - Intelligent Transportation Systems
- STP - Surface Transportation Program
- ENH - Enhancement Funds under STP
- NHS - National Highway System

Year of Operation indicates when the facility or service will be open to traffic or for public use. **Conformity Status** reflects one of three classifications: test (for capacity type projects evaluated using the travel demand model), review (for minor projects evaluated using an off-model approach), or programmatically conforming - PC (for projects which are exempt from the requirement to determine conformity) in accordance with meeting the CAAA. **CMS Corridor** indicates the congestion management system corridor within which the project is located in the Baltimore region. The Congestion Management System seeks to alleviate areas of congestion and encourage more efficient use of existing facilities. Exhibit IV-1 depicts the CMS corridors across the region.

The **Physical Data** line, which pertains to road projects, indicates the project length in **Miles** and the present/future number of **Lanes**.

Also included for road projects is an indication if the project is a **Highway Capacity Improvement** or if it is part of the **National Highway System**. The National Highway System Designation Act of 1995 (NHS) was signed into

law on November 28, 1995. The NHS designates key road segments that provide improved access to work and markets; to ports, airports, and rail stations; to our national parks; and to bordering countries. Principal contributions of the NHS are to facilitate sustainable economic growth by enhancing intermodal and highway system connections, improving productivity and efficiency of commercial vehicle operations, facilitating the movement of agricultural produce, advancing safety, alleviating congestion, supporting national defense, and improving system performance. Nationally, the total mileage is about 160,955 miles and includes the Interstate Highway System, as well as other roads important to the nation's economy, defense and mobility. Inclusion in the NHS is designated under the project description. Exhibit IV-2 depicts the adopted NHS for the Baltimore region.

For all projects, the adopted plan or program in which the project is contained is designated under the project justification.

In the listing in Chapter VI, project costs are presented on the basis of the amount of federal funding previously received or expected to be requested during a

particular year. All figures are in thousands of dollars. The abbreviations in the **Phase** column stand for the following:

PP - Project Planning
PE - Preliminary Engineering
ROW - Right-of-way or property acquisition
CON - Construction
OTH - Other

The **Annual Element** section for each project listing indicates projects for which federal funding in FY 2008 is requested. The **Matching Funds** column indicates the state and/or local funds programmed to match the federal funding requested for that fiscal year. In all but a few cases, the local match is provided by the agency or jurisdiction under which the project is listed.
