Brent Rushing
President

Mr. Rushing,

Effective February 1, 2011, Exide will adjust its price schedule with a weighted 2.4% increase. Furthermore, the core charge deposit will be increased by \$2.08 per unit value.

The rationale for an increase of this nature is multi-fold. In particular, all battery manufacturers find themselves struggling with the global lead equation. As for Exide, we continue to experience very tight core inventory conditions while paying you, the battery specialist, unprecedented high core credit values. While these prevailing market conditions are benefiting many of our best customers, we can no longer deny the cost pressure it is creating on our finished goods.

Furthermore, we are starting to see Diesel creep up again which is adding significant cost to our freight (company fleet and carrier) ledger. Being a fully integrated supplier of Lead and Battery Products, our market pricing is dramatically influenced by our overall freight costs.

Finally, other non-lead alloys and production costs are either rising or are failing to recede. In many cases, we had temporarily agreed to insulate our customers from some of these factors in anticipation of a market or commodity correction that never occurred. At this time, we can no longer absorb these variances.

We'll continue to make strategic investments in new products, brands, high quality sales personnel and "pull through" programs—all focused on helping you grow your business. From our viewpoint, these "investments" are critical, and help us and our customers differentiate ourselves from the competition.

Thank you for your support, this past year has provided tremendous growth within the Battery Specialist Channel. We believe that the momentum (and optimism) will carry forward to 2011 and beyond, affording you, our long-term strategic partner even more growth and profit opportunities than ever before.

We are committed to partnering with you in a way that others either can't or won't. Thank you for supporting Exide in the past, and we look forward to yet another dynamic, record-setting year in 2011.

Very truly yours,

Jeff Barna

BEST Battery Contract Accounts
Exide Feb 2011 Pricing Actions

The purpose of this memorandum (addendum) is to provide BEST Battery contractual accounts with details relative to the Exide February 1, 2011 battery and core charge increases.

Exide is having a weighted average increase of 7.24% effective February 1, 2011. This is a combination of the 2.4% cost of living increase and the \$2.08 per unit increase in the core charge per unit that is being imposed due to the increase in cost of acquiring lead.

Please Note: Core / Junk credit (aka Core Purchase Pricing) is not being adjusted with the February 1, 2011 pricing and core charge adjustment. Reducing the core purchase pricing - core credit will bring the core charge in line with actual costs.

Thank You for you continued support.
