Bringing MBUF Exploration to the East Coast

Dr. Patricia Hendren
Executive Director, I-95 Corridor Coalition
Insights to share from I-95 MBUF Study

1. The problem is here and now

2. Opportunities abound

3. I-95 MBUF study overview

4. Phase I pilot launch
THE PROBLEM
Transportation revenue is declining

Vehicle Miles Traveled

Gas consumption with increased efficiency

VMT Growth

Revenue loss due to increased fuel economy

Year

1 semi-autonomous car generates 4 terabytes of data a day
MORE DATA THAN 3,000 PEOPLE
People are more connected & demanding

- **411 Million devices worth $34 billion**
- **92% Of adults now have a cell or smart phone**
- **$6.5 Billion in revenue by 2019**
- **$57.6 Billion a year on the on-demand economy**

WEARABLE TECH | SMART PHONES | RIDE SHARING | ON-DEMAND SERVICES

I-95 Corridor Coalition Mileage-Based User Fee Study
MBUF is the intersection of these trends
East Coast voice is needed

I-95 Corridor Coalition Mileage-Based User Fee Study
I-95 Coalition STSFA Grants

**Purpose:** Explore the feasibility of replacing the gas tax with a mileage-based user fee program in a multistate environment

- **OUT-OF-STATE MILEAGE**
  How will travel across boundaries be handled?

- **TOLLING**
  What is the relationship between tolling and MBUF?

- **TRUCKING**
  How does a user-fee fit into current requirements?

- **AMENITIES**
  Will value-added amenities help with public acceptance?
Important to Remember:

The I-95 Corridor Coalition members want to promote a better understanding of why investing in transportation is important, and why the current fuel tax does not provide a long-term and equitable solution in this regard. The Coalition, representing transportation agencies along the entire Eastern Seaboard, believes exploring the feasibility of a MBUF solution is important; for now, however, the Coalition is neutral if MBUF is the ultimate solution.
OOS travel happens everyday

- The I-95 MBUF study will examine issues associated with the large amount of out-of-state (OOS) travel in the corridor.
  - For example, over 4 million person trips are made annually by car between the Washington DC metropolitan area and the Philadelphia, Pennsylvania area.
  - And, 16% of Delaware residents work in another state while 15% of Delaware workers live in another state.
Toll roads are common in the corridor
Intersection of Tolling and MBUF

- **Interoperability**
- **Using toll data to support MBUF**
  - Estimate out-of-state travel
- **Using MBUF to support toll collection**
  - I-95 (Two-way barrier toll)
  - Delaware Memorial Bridge (One-way barrier toll / entering DE)
  - Delaware SR-1 (Toll depends on where vehicle enters / exits)
- **Role of back office centers in MBUF**

What do people want?

- Geofencing
- Battery Health
- Remote Emissions
- Engine Health
- Trip Log
- Driver Scores
- Gamification
- Find My Car
5 Billion TONS OF FREIGHT

Almost 40% of America's GDP passes through the Corridor
Multi-State Truck Pilot- Phase II

• The I-95 Corridor Coalition truck pilot, slated to begin by the end of the year, will include 50 vehicles equipped with EROAD in-vehicle hardware for six months.

• The EROAD system will record accurate GPS-based mileage data and use applicable formulas to support MBUF.

Trucks have been collecting MBUF data for decades as part of the International Fuel Tax Agreement (IFTA).
PILOT LAUNCHED!
Phase I Pilot: May 1 – July 31

149 participants

- 77% Plug-In Device with Location
- 16% Plug-in Device w/o Location
- 7% Android Phone w/o Location

13 coalition states with residents participating
