- Demonstration

# Outline

# Background: What are the Migration Data?

Migration data show the movement of individuals, via the address listed on Form 1040, over a two-year period

As an example...

The data are available at the State or county level:

- Number of inflows – residents moving in
- Number of outflows – residents moving out

# Background: What are the Migration Data?

## State level

- (1) State-to-State Inflow
- (2) State-to-State Outflow

## County level

- (1) County-to-County Inflow
- (2) County-to-County Outflow

Origin from Alabama (State Code)	Destination into			Number of returns	Number of exemptions	Adjusted gross income (AGI)
	State Code	State	State Name	(1)	(2)	(3)
01	96	AL	AL Total Migration US and Foreign	51,971	107,304	2,109,108
01	97	AL	AL Total Migration US	50,940	105,006	2,059,642
01	98	AL	AL Total Migration Foreign	1,031	2,298	49,465
01	01	AL	AL Non-migrants	1,584,665	3,603,439	87,222,478

# Background: History of the Migration Data

Previous  
Methodology

New  
Methodology

- Based on returns filed up until late September
- Matched on Primary Taxpayer only

- Based on returns for the full calendar year
- Matched on Primary, Secondary, and Dependents

What didn't change?

Maintained consistency between final tables, layout, codes, and disclosure

# Why change the methodology?

- Greater flexibility
- Increased population
- Inclusion of higher income tax filers

# Including Tax Returns after late September, Increases Population Size by 4%

Percent of total

Percentage of Returns, Calendar Years 2012-2019

# Tax Returns after late September account for 4% of Returns, but over 10% of Total Income

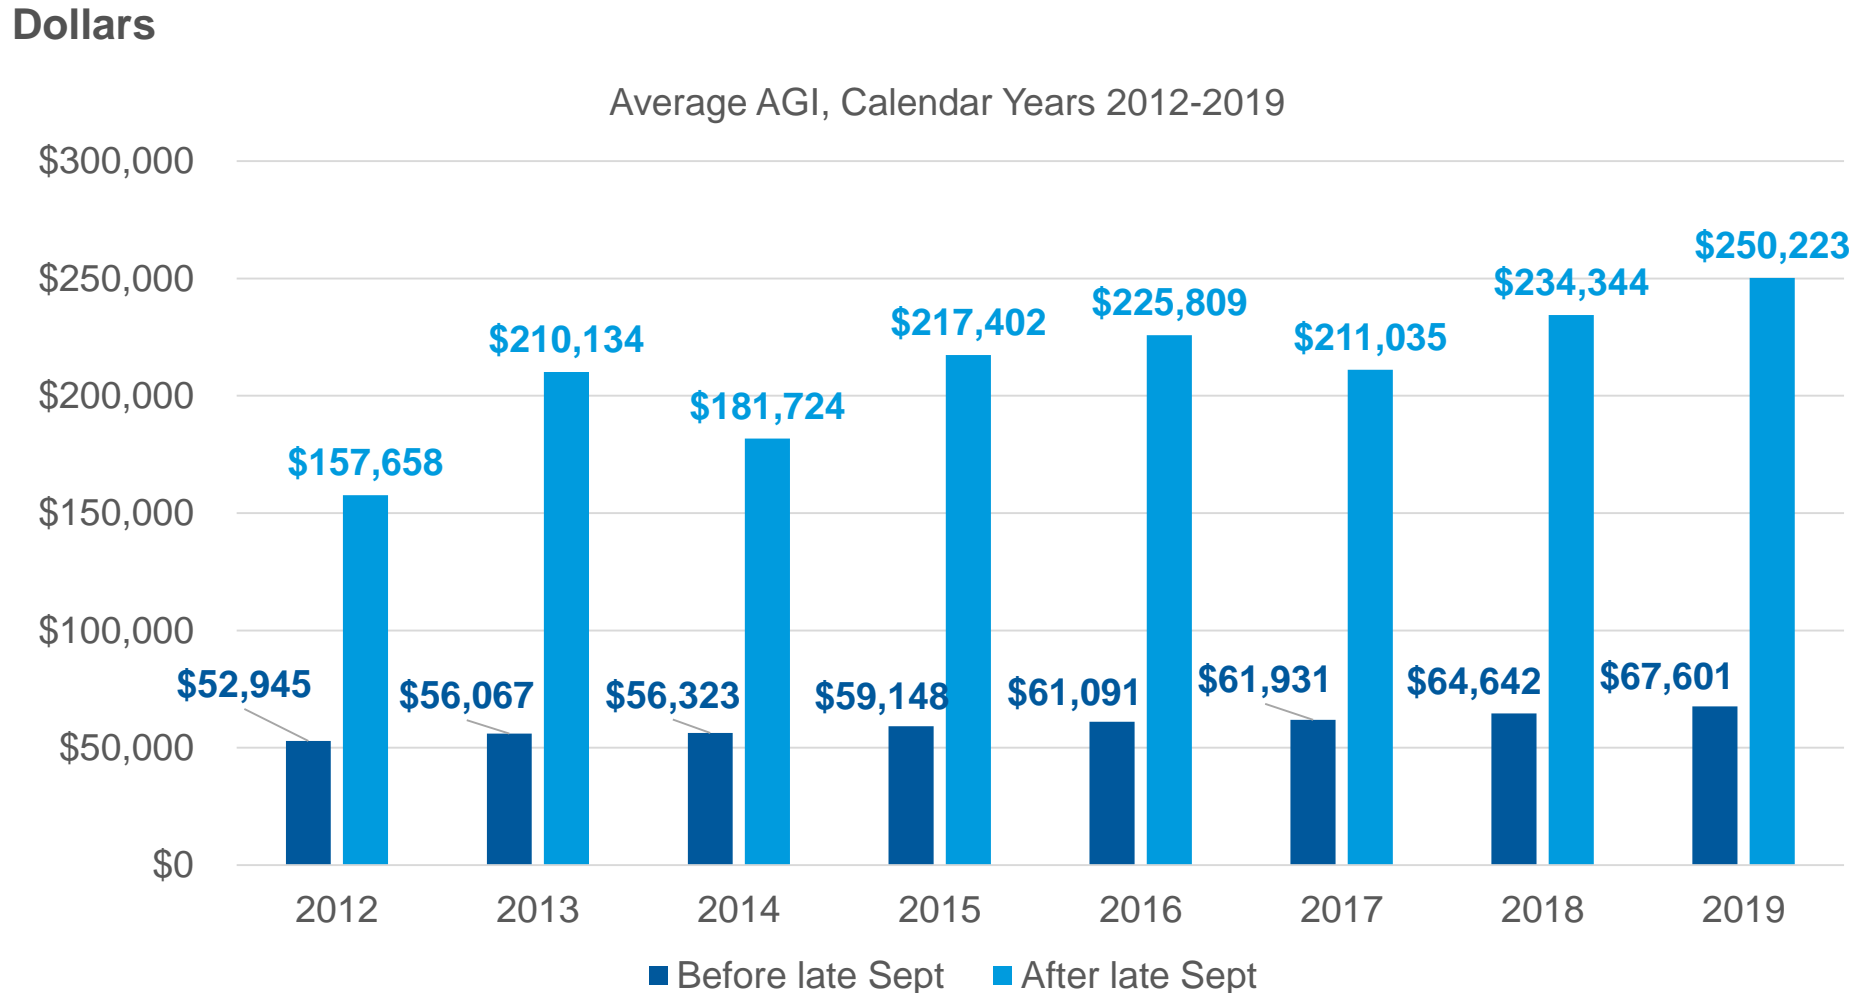

Percent of total

Percentage of AGI, Calendar Years 2012-2019

# Tax Returns after late September have Higher Average AGI

# Enhanced Merging Increases Population by 5%

Filing position	2011-2012	2013-2014	2014-2015	2016-2017	2017-2018	2018-2019
Primary-Primary	94.60	94.73	94.89	94.48	94.75	94.96
Primary-Secondary	0.84	0.85	1.08	1.07	1.04	1.02
Secondary-Primary/Secondary	1.67	1.60	1.83	1.73	1.69	1.66
Dependent-Primary/Secondary	2.88	2.82	2.20	2.72	2.52	2.36

# Data Anomalies

- ACS, CPS, IRS Comparison
- Updated Methodology vs Previous Methodology

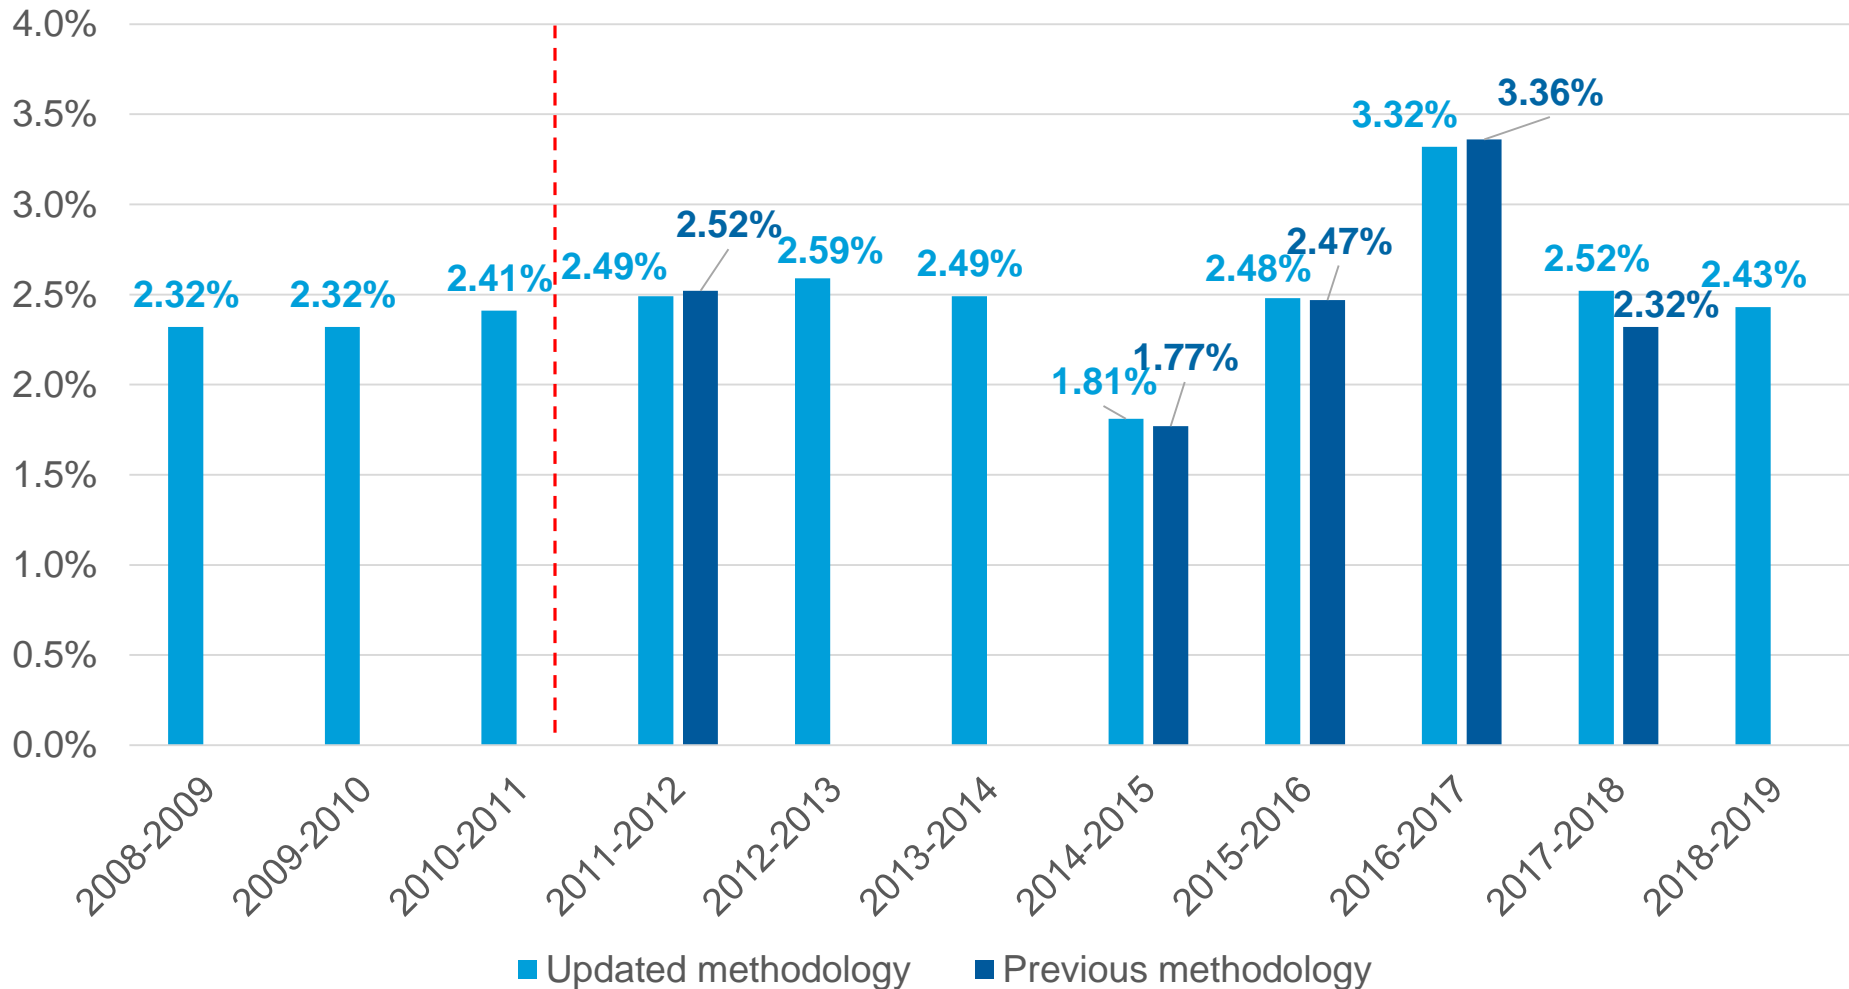

# Percent of Interstate Movers: ACS, CPS, IRS

Percent of movers

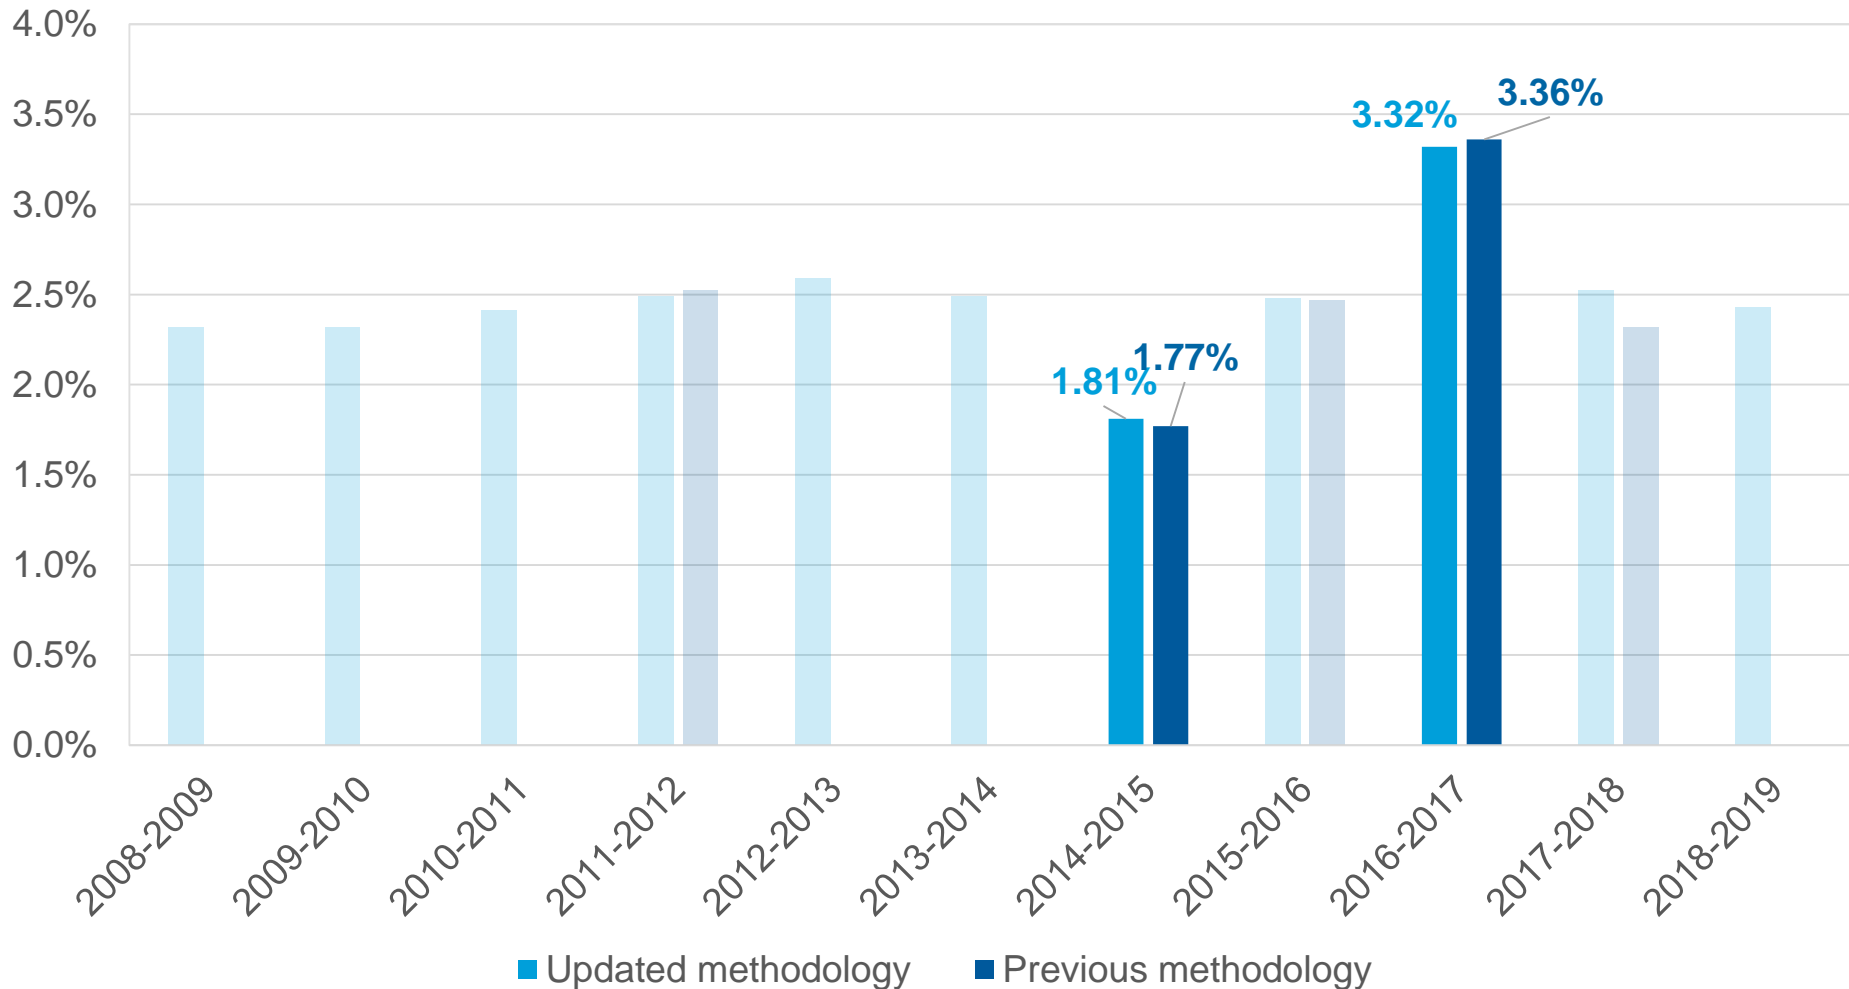

# Percent of Movers: Updated Methodology vs Previous Methodology, 2008-2019

Percent of movers

# Percent of Movers, Updated Methodology vs Previous Methodology, 2008-2019

Percent of movers

# IRS Migration and Census PEP

# IRS Migration and Census PEP Comparisons

	IRS Migration Data	Census PEP Migration Estimates
<b>Data used</b>	IRS tax return filing population + SSA Numerical Identification File	IRS tax return filing population + Medicare enrollment data + Group Quarters data + SSA Numerical Identification File
<b>Tax return time period covered</b>	Returns processed by end of December	Returns processed by late September
<b>Matching procedure</b>	<p>Primary, Secondary, Dependent filers (year 1) to Primary/Secondary (year 2)*</p> <ul style="list-style-type: none"> <li>• <b>Only matched records over 2 years are included</b></li> <li>• Dependent returns in year 1 and year 2 are excluded</li> <li>• Nonfilers are excluded</li> </ul>	<p>Individuals (from IRS + Medicare data) in year 1 to individuals in year 2</p> <ul style="list-style-type: none"> <li>• <b>Only matched records over 2 years are included</b></li> <li>• Because of person-based method, dependent records are included</li> <li>• Nonfilers could be represented in Medicare data</li> </ul>
<b>Geographic coding</b>	<p>Records are geocoded based on 9-digit ZIP code</p> <ul style="list-style-type: none"> <li>• If county cannot be determined, records are excluded</li> </ul>	<p>Records are geocoded based on 9-digit ZIP code</p> <ul style="list-style-type: none"> <li>• If county cannot be determined, records are coded based on address</li> </ul>

\*Beginning with 2011-2012 IRS data

# IRS Migration and Census PEP Comparisons

	IRS Migration Data	Census PEP Migration Estimates
<b>Data released</b>	Data are released and updated annually independent of previous iterations	Data are released annually and include an updated time-series beginning with the previous Census or point in time series
<b>Methodology</b>	<p>Direct method of calculating migration using matched population of tax returns</p> <ul style="list-style-type: none"> <li>• <b>Identify immigrant, outmigrant, and nonmigrant returns based on ZIP code of origin (year 1) and destination (year 2)</b></li> <li>• Microdata are aggregated into state and county flows</li> <li>• Data below 10 returns are grouped into various “Other” categories or suppressed</li> </ul>	<p>Indirect method of calculating domestic migration based on matched IRS + Medicare records</p> <ul style="list-style-type: none"> <li>• Data split into age groups (0-17, 18-64, and 65+)</li> <li>• <b>Identify immigrants, outmigrants, and nonmigrants based on ZIP code of origin (year 1) and destination (year 2)</b></li> <li>• Calculate net domestic migration rate (NDMR) for an area (Ins-Outs)/(Nonmigrants + Outs)</li> <li>• Apply NDMR to household population to create net domestic migration estimate</li> <li>• Add the domestic migration estimate for the 3 age groups to the total GQ change</li> </ul>

# Future Plans

# Future Plans

Future plans include the continued use of tax return information, as well as greater use of information returns (W-2, 1099-R, 1099-SSA, 1099-MISC, 1099-G)

- Include nonfilers in population
- Use of info return ZIPs + tax return ZIPs, could be less susceptible to identity theft/IRS processing changes

Form W-2 Wage and Tax Statement 2018. This form is used to report an employee's wages, taxes, and other compensation. It includes fields for Employer identification number (EIN), Employer's name, address, and ZIP code, Control number, Employee's first name and initial, Last name, Suffix, and Employee's address and ZIP code. It also includes boxes for Wages, tips, other compensation; Federal income tax withheld; Social security wages; Social security tax withheld; Medicare wages and tips; Medicare tax withheld; Social security tips; Allocated tips; Verification code; Dependent care benefits; Nonqualified plans; and State wages, tips, etc.; State income tax; Local wages, tips, etc.; Local income tax; and Locality name.

Under consideration...

- Moving to an individual-based matching procedure
- How should we assign income for joint tax filers?
- What types of income should be included for nonfilers?
- How far back should we apply any new methodology?
- What other items should we consider?

Form 1099-G Certain Government Payments 2018. This form is used to report certain government payments, including unemployment compensation, state or local income tax refunds, credits, or offsets, and taxable grants. It includes fields for Employer's compensation, State or local income tax refunds, credits, or offsets, Federal income tax withheld, and Taxable grants. It also includes a section for Recipient information, including State, State identification number, and State income tax withheld.

Form 1099-R Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc. 2018. This form is used to report distributions from pensions, annuities, retirement or profit-sharing plans, IRAs, insurance contracts, etc. It includes fields for Gross distribution, Taxable amount, Capital gain (included in box 2a), Federal income tax withheld, Employee contributions/Designated Roth contributions or insurance premiums, Net unrealized appreciation in employer's securities, Distribution code(s), IRA/SEP/SIMPLE, Other, Your percentage of total distribution, Total employee contributions, State tax withheld, State/Payer's state no., State distribution, Local tax withheld, Name of locality, and Local distribution.
