**Description:**

Baltimore-Washington Rapid Rail (BWRR), a private company based in Maryland, is proposing to construct an SCMAGLEV train system between Baltimore, Maryland and Washington, DC with an intermediate stop at BWI Marshall Airport. An Environmental Impact Statement (EIS) is being prepared to evaluate the potential impacts of the construction and operation of such a system.

This phase of the project is being funded by a grant from the Federal Railroad Administration with matching funds provided by BWRR. This project is represented in both the Baltimore Regional Transportation Board (BRTB) (50%) and National Capital Region Transportation Planning Board (TPB) (50%) TIPs.

**Justification:**

Over the next 30 years, population in the Baltimore-Washington region is expected to grow by 30 percent, significantly increasing demand on roadways and railways between the two cities. The purpose of BWRR’s proposed action is to increase capacity, reduce travel time, and improve both reliability and mobility options between Baltimore and Washington, with possible future extensions to New York City.

**Connection to Long-Range Transportation Planning Goals:**

- 4.C Increase Mobility -- Expand transit service coverage / hours of operation.
- 5.A Conserve and Enhance the Environment -- Provide alternatives to single-occupant passenger vehicles / apply emission reduction technologies.
- 7.E Promote Prosperity and Economic Opportunity -- Improve access to existing communities and regional generators of economic activity.

**Description:**

MPA's TIGER project has three portions: provide rail access to Fairfield Marine Terminal; widening and straightening the navigation channel to Seagirt Marine Terminal; and filling the Fairfield Basin to develop seven acres of new land for cargo storage.

**Justification:**

The current access channel to Seagirt is deep enough; however, it has several turns and is too narrow for the next generation of container ships that are able to transit the Panama Canal. The suitable material dredged from this widening will be used as fill in the WWII-era shipbuilding basin to create new land needed for cargo storage (and cost avoidance to replace dilapidated bulkheads). Rail access to Fairfield will allow more efficient cargo movement.

**Connection to Long-Range Transportation Planning Goals:**

- 7.E Promote Prosperity and Economic Opportunity -- Improve access to existing communities and regional generators of economic activity.
- 7.F Promote Prosperity and Economic Opportunity -- Provide context-sensitive infrastructure and facilities.

**Description:**

This is an ongoing program to provide traffic control, management, and monitoring on State highways. These improvements may include but are not limited to the employment of variable message signs, video for traffic management (CCTV), traffic management detectors, signal systemization and remote timing, permanent congestion monitoring systems employed by the CHART program, deployment of local jurisdiction intelligent transportation system (ITS) projects, and the development of park-and-ride facilities.

This project also includes a program that replaces older drayage trucks serving the Port of Baltimore with newer trucks that meet or exceed 2007 EPA emissions certified engine standards.

**Justification:**

These projects together provide an important air quality component of reducing emissions from motor vehicles in the Baltimore region. Most of these projects will improve safety and traffic flow operations on the existing highway system without major new construction. They will save motorists time by allowing them to avoid traffic congestion. Some of the projects will reduce congestion through the use of ITS technology innovations in communication, advanced traffic management, traveler information, etc.

**Connection to Long-Range Transportation Planning Goals:**

- 4.A Increase Mobility -- Provide techniques or alternatives as part of a Congestion Management Process (CMP).
- 5.C Conserve and Enhance the Environment -- Provide incentives for zero-emission vehicles.

**Description:**

Replacement of Bridge 0311305 on the I-695 Inner Loop over Benson Ave and Bridge 0311405 on the I-695 Inner Loop over Leeds Avenue, US 1, AMTRAK and Herbert Run. The project also includes the realignment of the I-695 northbound on-ramp from Leeds Avenue to US 1. Both bridges will be widened to accommodate the future widening of I-695. US 1 will be narrowed to one lane in each direction extending approximately 2,400 feet north and south of I-695. The project is open to service, with the remaining funding for this project completing right-of-way acquisition.

**Justification:**

The bridges on the I-695 Inner Loop over Benson and Leeds/US 1/ AMTRAK/ Herbert Run are nearing the end of their useful life and were rated in poor condition. An existing ramp will be realigned as part of this project to provide a more direct connection from US 1 to the Inner Loop of I-695 and to remove interstate traffic from residential areas.
